ACL Drill Guide System

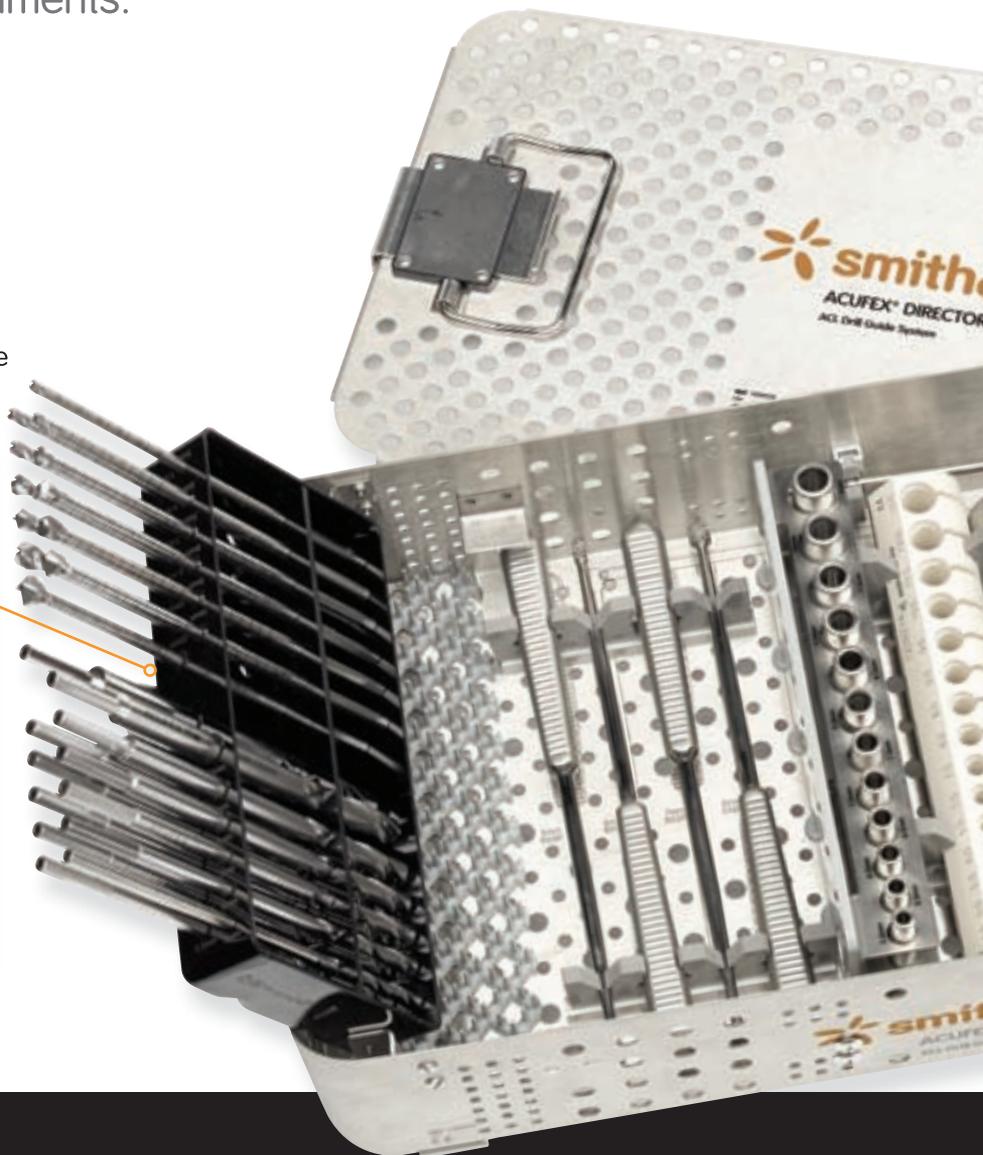

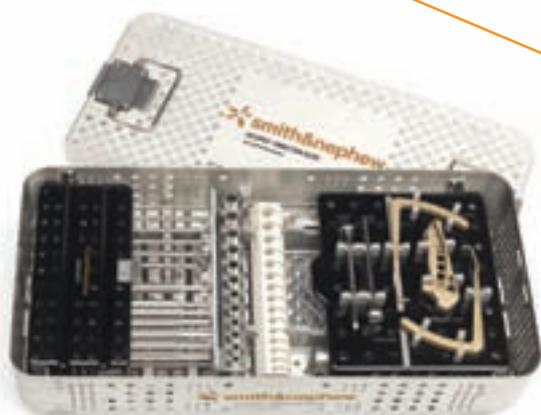

So organized the instruments
almost put themselves away

Organized. Comprehensive. Durable.

There is no shortage of adjectives to describe our new instrument tray, the ACUFEX[®] DIRECTOR ELITE[®] ACL Drill Guide System. Likewise, there is no shortage of places to store instruments. The swing-out racks and mini trays provide a slot for everything, from drills to aimers, to rasps and chondral picks. We even left some free space for loose instruments.

Swing-out drill racks

Tightly organized for OR efficiency, swing-out racks include slots for virtually every instrument – from whole and even half-size drills to aimers and chondral picks. No more searching the bottom tray for an instrument.

NEW Universal Endofemoral Aimer*

*Patent pending

Ergonomic design

Straight or offset positions for aimers and chondral picks let you work in-line or at a 60° angle, accommodating transtibial and anterior medial (AM) portal approaches.

Modified aimer tip

Anatomic hook allows for easy access through the fat pad, and longer tip facilitates positioning at the over-the-top position. Size markings at the tip.

Versatile

Universal handle works with six different aimers and five chondral picks. Works with 2.4 mm and 2.7 mm guidewires.

Color-coded aimers

Aimers have color-coded rings for quick identification of size (e.g. red = 6 mm).

Snap-in connector system

Allows quick switching and release of aimers and picks.

Extra room if you need it

Even with the swing-out racks, the bottom of the tray still has room for loose instruments.

Small footprint

Efficient design eliminates the need to lift out a top tray, reducing the area you need for the drill guide system.

Designed from customer input

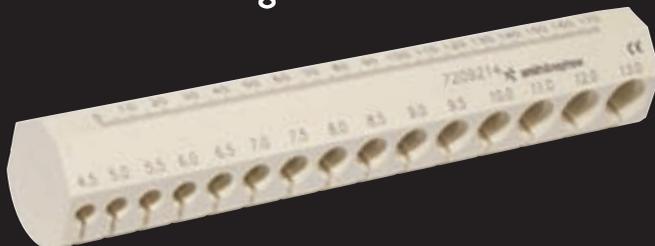

Designed using feedback gained from our Voice of the Customer program, this modular and tightly-organized system is what you've been asking for.

Stainless-steel outer construction

Durable; no plastic to fade, crack or break. Typical weight, fully loaded: 16-18 lbs. Maximum allowable weight: 22 lbs.

NEW Slotted Sizing Block

Our redesigned graft sizing block accommodates a wider range of graft sizes, such as smaller grafts used in anatomic ACL reconstructions and large allografts. Slots allow for easy suture and graft passage.

- 15 sizes in all, from 4.5 to 13.0 mm, including ½ sizes
- New sizes include 4.5, 5.0, 5.5, and 13 mm

NEW Tunnel Plug

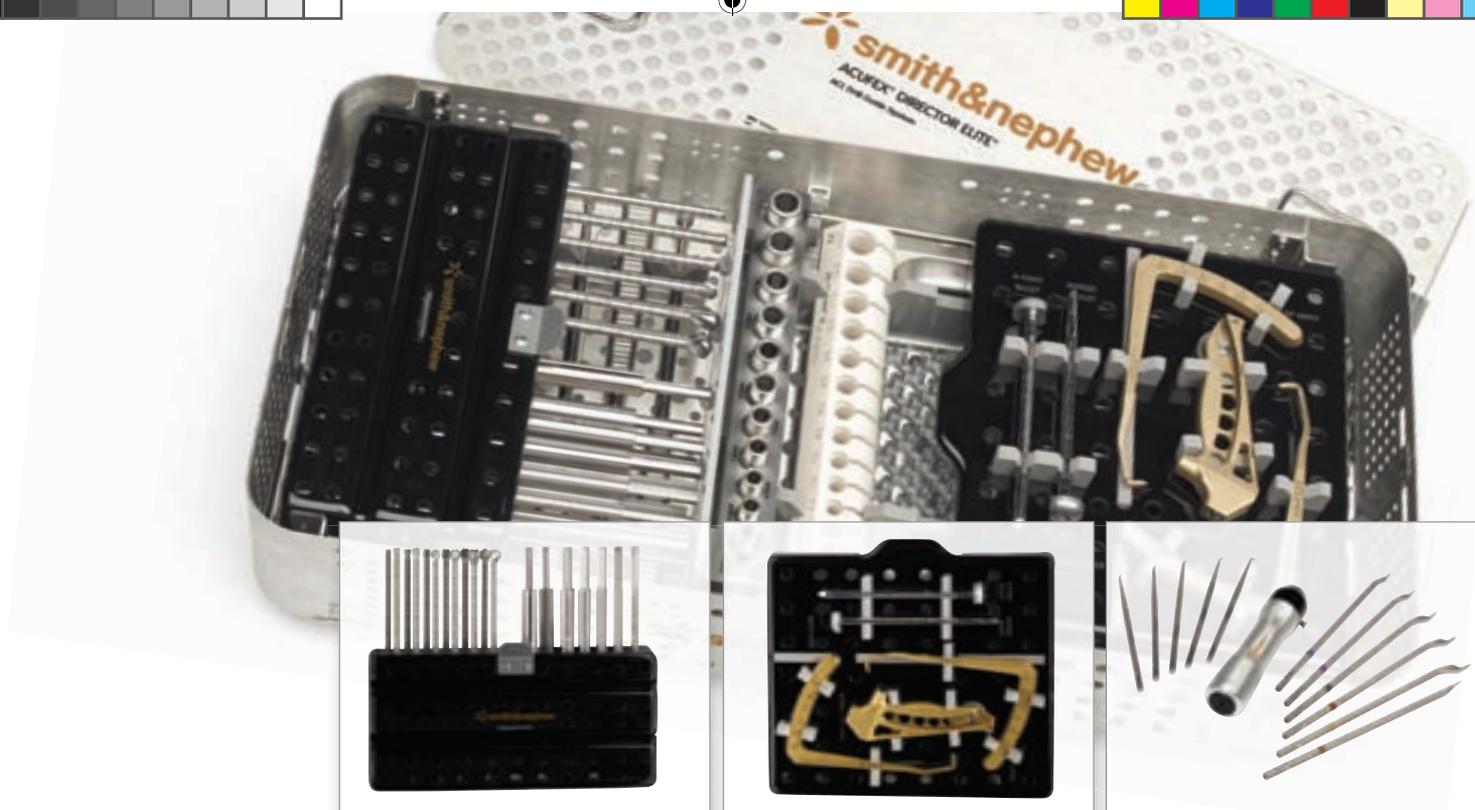

Now available in 5.0–6.0 mm size

NEW ACL Rasps

Now available in 5.0 mm and 6.0 mm sizes

Ordering Information

72207235 ACUFEX® DIRECTOR ELITE®
ACL Drill Guide System

System includes:

72201731	Sterilization tray	7208686	Endoscopic cannulated drill, 5 mm	72201732	Universal endofemoral aimer handle
013498	Cannulated drill, 5 mm	7207482	Endoscopic cannulated drill, 5.5 mm	72201737	Endofemoral aimer arm, no offset
7207491	Cannulated drill, 5.5 mm	013499	Endoscopic cannulated drill, 6 mm	72201713	Endofemoral aimer arm, 3 mm offset
013542	Cannulated drill, 6 mm	7207492	Endoscopic cannulated drill, 6.5 mm	72201714	Endofemoral aimer arm, 4 mm offset
7207483	Cannulated drill, 6.5 mm	013660	Endoscopic cannulated drill, 7 mm	72201715	Endofemoral aimer arm, 5 mm offset
013543	Cannulated drill, 7 mm	7207493	Endoscopic cannulated drill, 7.5 mm	72201716	Endofemoral aimer arm, 6 mm offset
