GTS (Gait Training System)

GTS

GAIT TRAINING SYSTEM RAIL AND GAIT SUIT SET (M SLING + M SUIT)

GTS - a body weight support system composed with walking rail, walking equipment, and suit, etc to have gait training and graduated circuit rehabilitation training. GTS guides elders or patients with chronic disabilities to do various functional activity of daily living in hospitals and rehabilitation centers effectively. As users can walk safely and independently, it makes therapists lighten from physical load.

- ✔ GTS is a unique method to train patients who cannot walk independently caused by severe damages
- ✔ Group therapeutic exercise system can let many users can have training at the same time
- ✔ Step-by-step rehabilitation training for outdoor walking is possible
- ✔ GTS provides circulatory rehabilitation training on flat ground, slopes, and other task-oriented activities for adapting to scenarios relating to walking outdoors
- ✔ With the Turn Terminal System, either automatic or manual, users can change rail direction without affecting each other
