Physical Training System (PTS)

PTS (Physical Training System)

- Sliding system with three veloz sling units
- Smooth axis movement by bearing driving system
- Toothed wheel typed locking device (Stable movement without shaking or nodding)
- Minimize gravity by total body support

Manual & Exercise Therapy

The features of the Physical Training System

Equipment and sling are unitized and move smoothly with the bearing drive method through the round bar axis, which is stable without shaking or nodding by using the toothed wheel-type lock.

- You can apply the "Helping Hand" principle using various accessories for Manual and Exercise Therapy.
- You can freely perform the different types of exercise at the same time with 3D motion using the 3 Axis & 3 Plan.
- Total Body Support minimizes gravity, which stably performs Manual Therapy, making it easy to find the Neutral Zone.
- Static Stability Exercise Therapy is possible through little resistance with Total Body Support.
